Ex parte Communication
ET Docket 18-295 and GN Docket 17-183
Unlicensed Use of the 6 GHz Band

Dear Ms. Dortch:

Over the course of this proceeding, equipment manufacturers and licensed operators have filed comments on three basic methods for the deployment of unlicensed devices in licensed 6 GHz bands:

1. **No coordination** (an overlay of unlicensed devices):

The random deployment of unlicensed devices -- even inside buildings with the lowest EIRP of 14 dBm -- will cause harmful interference to existing licensed stations¹.

2. **Coordination After Deployment** (use of Automatic Frequency Coordination):

This requires a sophisticated AFC -- with detailed structural, organizational and procedural mechanisms that have yet to be determined² -- which is expected take years³.

3. **Coordination Before Deployment** (TSB10-F):

Use the procedures of TSB10-F -- which for over two decades has been used to protect existing licensed stations from harmful interference from new licensed devices -- to protect existing licensed stations from new deployments of unlicensed devices.

Throughout this proceeding there have been two imperatives:

1. That Licensed Stations be protected from harmful interference⁴.

¹ ECC reply comments filing of March 14, 2019, Section II, A.

² AT&T, Comsearch and Verizon filing of April 22, 2019.

³ Wi-Fi Alliance filing of May 2, 2019, Slide 12.

⁴ FCC NPRM ET Docket 18-295 para. 1; Verizon ex parte filing June 8, 2018 GN Docket No. 17-183; Harris, Wiltshire & Grannis, ex parte filing June 2, 2018 para 2; Ericsson ex parte filing January 30, 2018 GN Docket No. 17-183 para 3.

2. That the Commission proceed expeditiously⁵ to a Report and Order.

It is clear that proposals for:

- **No Coordination** does not meet the imperative to Protect Existing Licensees
- **Coordination After Deployment** does not meet the imperative to Expeditiously Proceed to a Report and Order.

This is why ECC believes it is in the public interest for the Commission to take a two-pronged approach⁶:

1. Immediately authorize the use of the proven procedures of TSB10-F to prior coordinate Safe Areas⁷ in urban, suburban and rural communities nationwide, within which unlicensed devices can be deployed without causing harmful interference to existing licensed stations.

While also pursuing:

2. A multi-step approach to developing a nationwide AFC system.⁸

By this two-pronged approach, the United States gets the immediate benefits of the safe deployment of unlicensed Wi-Fi and 4G/5G small cells in the 6 GHz band, while the technical, structural, organizational and procedural mechanism details of a nationwide AFC system are being explored.

Respectfully submitted.
